# Gift of Life USA

Gift of Life USA is a 501 (C) (3) non-profit organization founded with the aim to help the specially-abled and nurture acceptance and empathy, bridging the gap across the various communities that form our society.

The organization strives at helping the specially and differently abled in the areas of health, education and social awareness.

Apart from combating social stigma by raising awareness about different disorders, the true strength of Gift of Life USA lies in the funding and support it gives to individuals with these various physical and mental disorders. Gift of Life USA appeals donors to come, see, believe and support these true abilities and beyond. Donations and additional information can be found on website [www.giftoflifeus.org](http://www.giftoflifeus.org).

Our mission is to generate efficient resources to support the specially-abled (physically and mentally challenged), through advocacy, education and generating effective resources.

Our vision is to support the needs of, as well as develop as many specially-abled as possible, to be self-reliant, self-independent individuals with growing acceptance in the community, friends & families.
